

## The African Union Commission's CESA ICT in Education Cluster panel session: "ICT in Education initiatives: expectations and way forward to achieve the SDGs"

On 21-September, the African Union Commission's CESA ICT In Education Cluster and Millenium@EDU co-host a panel on "ICT in Education initiatives: expectations and way forward to achieve the SDGs" as part of the Sustainable Education Meeting, 21-22 September 2017, in New York City (USA).

The panel will look at how national ICT in Education initiatives can help achieve the goals of the Continental Education Strategy for Africa (CESA 16-25), and more specifically, what do African governments and their partners, and more specifically education and training systems' leadership and stakeholders expect to achieve in relation to their policy objectives: more and better trained teachers, improved learning outcomes, equal access to learning opportunities and employable skills for ALL? Can the policy objectives go beyond conventional education and encompass more global development goals such as reducing digital gaps, improving access to public services, financial inclusion, enabling inclusion through digital technologies, lifelong learning, etc.?

**Keynote speaker: H.E. Prof. Sarah Anyang Agbor, Commissioner for Human Resources, Science and Technology, African Unon Commission**
